

### **Informed Consent Statement**

You have been invited to participate in an anonymous research study being conducted by faculty and students at Queens University of Charlotte. In this survey, you will be asked a series of questions about your attitudes regarding immigration, along with some basic demographic questions. At no point will you be asked to reveal your citizenship status.

Your participation should take no longer than 5 minutes. There are no known risks associated with this study, and no benefits are being offered to you. The results of this study will be used in academic research and shared with community leaders.

Your participation in this study is entirely voluntary, and you can withdraw your participation at any time by quitting the survey. However, please keep in mind that complete results will be more helpful than incomplete ones, so we would appreciate your honest answers for all questions.

Queens University of Charlotte wants to make sure that you are treated in a fair and respectful manner. Contact the University's Institutional Review Board ([irb@queens.edu](mailto:irb@queens.edu)) if you have any questions about how you have been treated as a study participant.

By proceeding with this survey, you are confirming that you are at least 18 years old, and you are providing your informed consent to be a voluntary research participant. Thank you for carefully considering your participation in this important project.
